

SENTINEL™ FOOD SERVICE BOARD

SENTINEL™ FOOD SERVICE BOARD

In a food service environment, durability and dependability are the key attributes on which brands and consumers rely. Although these products may have a relatively short shelf life, the job they perform is important in creating repeat business and building brands. The coatings on Sentinel paperboard promote stability and efficient, accurate converting to a variety of forms, including cups, trays and tubs. We also offer coatings that protect both hot and cold products.
