

SENTINEL™ CUP STOCK

SENTINEL™ CUP STOCK

Cup stock is one of our core products, so we are always looking to adapt our product line to meet market needs. We are dedicated to finding sustainable and innovative solutions for your cup needs – from using the wood by-products as biomass to produce energy for our mills to launching the first fully renewable cup stock using sugarcane-based polyethylene. That, combined with our dedication to quality and our understanding of evolving consumer preferences, makes us a great partner for your products.

Sentinel Cup Stock is suitable for both hot and cold cup applications and is available in a basis weight range of 136 – 210 lb/3000 ft² or a board caliper of .012 – .020 in.
