

# SENTINEL™ ICE CREAM BOARD

Consumers love ice cream. That's why ice cream packaging represents such an opportunity for brands to establish strong connections with consumers. Ice cream demands a specific controlled environment to maintain its freshness, which also makes it a challenging package for processors. At Evergreen Packaging we are committed to meeting the needs of processors, brands and consumers. Our Sentinel Ice Cream Board performs dependably and forms well, promoting production efficiencies. It also offers an excellent print surface for building brands and promoting premium benefits and maintains product freshness in a freezer environment. Since Sentinel products are fiber-based, they come from a renewable resource, trees from forests where responsible forest practices are used and where overall growth exceeds use. So, consumers can feel good about their purchase. And enjoy great quality ice cream.

Sentinel Ice Cream Board is suitable for food service and retail freezer applications and is available in a basis weight range of 136 – 210 lb/3000ft<sup>2</sup> or a board caliper of .012 – .020 in.

## Features:

- Consistent quality
- Excellent converting performance
- Superior strength properties
- Outstanding print quality
- Inquire about availability of certified fiber
  - FSC® Mix Credit<sup>1</sup>
  - PEFC™ Chain-of-Custody
  - SFI® Chain-of-Custody

## Benefits:

- Designed for poly extruding or coating applications
- Suitable for direct converting applications

## End Uses:

- Ice Cream Container
