

TAKE A CLOSER LOOK AT CARTONS: OUR RESPONSIBLE PACKAGING STORY

RENEWABLE RESOURCE

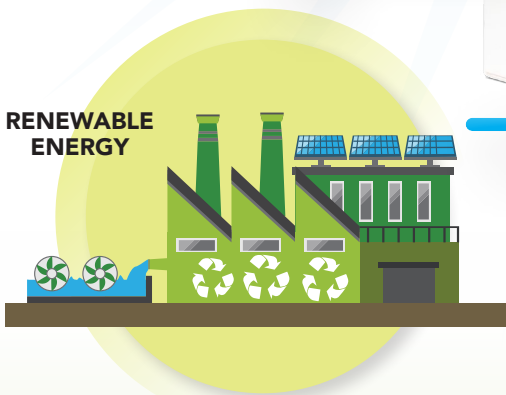

75% or more of any Evergreen Packaging® carton is made with fiber from trees grown in forests where responsible forestry practices are used.

RESPONSIBLE SOURCING

Evergreen Packaging sources renewable materials responsibly by maintaining three forestry certifications and conducting annual third-party audits.

RENEWABLE ENERGY

More than half the energy that fuels Evergreen Packaging's manufacturing process is from biomass. Biomass energy is renewable.

RECYCLABLE CARTONS

Cartons are recyclable. Recycle your cartons so other paper-based products can be made.
